

WRITTEN PRACTICE ANSWERS

- 1** 370,000
- 2** \$12.78
- 3** 459 seats
- 4** 54 hours
- 5** 3500
- 6** $\frac{7}{10}$; 70%
- 7** 2 decimal places
- 8** 3 dollars, 2 dimes,
5 pennies
- 9** \$4.80
- 10** $3\frac{1}{8}$
- 11** 1, 2, 5, 10
- 12** 10:30 a.m.
- 13** 207
- 14** 175
- 15** $\frac{2}{5}$
- 16** 0
- 17** \$5.08
- 18** 26 R 26
- 19** \$26.53
- 20** 0
- 21** $3\frac{1}{3}$
- 22** 4
- 23** $\frac{1}{4}$
- 24** 60 mm
- 25** a. 1
b. 1
- 26** $3\frac{3}{4}$ in.
- 27** $\frac{2}{7}$
- 28** See student work.
- 29** 64°
- 30** Sample: \$3.49 is about \$3.50, and $\$3.50 + \3.50 is \$7. Since the cost of two pucks is about \$7, the cost of six pucks is about $\$7 + \$7 + \$7$, or \$21.

Early Finishers:

Sample: By using compatible numbers to the nearest half-dollar, I found that Jason earned about $\$25.50 + \$35.50 + \$30$, or about \$91.
